

# The Ready Program

Preschool Program for Children with Autism

## SUMMER PROGRAM 2021

This summer program is for children with autism who are 3-6 years old and are able to engage in group activities without the support of a one-on-one personal aide. The focus will be on developmental skills, social skills, language and play skills as indicated on each child's IEP. Monday's session will have an emphasis on aquatic therapy and self-care skills. The focus will be on dressing/undressing for the pool, along with sensory, motor, cognitive, and language activities. The focus of pool sessions is strengthening, motor planning, and bilateral integration with some swim basics intermixed. This is not a 'learn how to swim' session even though that skill will be addressed at times. Tuesday through Thursday sessions will focus more intensely on academics, following classroom routines, social skills, and peer interactions. Speech therapy and Occupational therapy will be present in the classroom one time weekly where each child will receive 1:1 or small group treatment to address skills as indicated on IEP.

**DATES:** June 7, 2021 – June 30, 2021

**LENGTH:** Monday – Thursday, 4 days per week. *(Students must sign up for the entire program.)*

**TIME:** AM Session 9:00 – 12:00 or PM Session 1:00 – 4:00
